Vedant Vijay Shinde

(201) 668-7085 | Jersey City, NJ (Open to Relocation) | vshinde1@stevens.edu | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience analyzing transportation, retail, and operations datasets using Python, Power BI, and forecasting techniques to improve reporting efficiency, uncover trends, and support data-informed business decisions.

EDUCATION

Master of Science in Information Systems Expected Completion: 05/2026
Stevens Institute of Technology | Hoboken, NJ, USA | GPA: 3.94 | ***Master's Scholarship Award***

Bachelor of Engineering in Information Technology Completed: 05/2024
University of Mumbai | Mumbai, MH, India

TECHNICAL SKILLS

Data Analysis: Python (Pandas, NumPy), SQL, Excel (PivotTables, Forecasting), Statistical Analysis, Trend Analysis
Business Intelligence: Power BI (PL-300), Dashboard Development, KPI Tracking, Data Visualization, Stakeholder Reporting
Data Engineering: ETL Pipelines, AWS Data Integration, Data Cleaning, Structured Dataset Preparation, API Processing
Analytical Methods: Supply-Demand Analysis, Fairness Metrics (Gini, Alpha), Moving Average Forecasting, Root Cause Analysis

PROFESSIONAL EXPERIENCE

Stevens Institute of Technology | Hoboken, NJ
Research Data Analyst 11/2025–Present

- Standardized mobility datasets from 12+ cities using Python (Pandas, NumPy, GeoPandas), achieving an estimated 20% reduction in data inconsistencies and 25-30% faster processing
- Evaluated neighborhood-level supply–demand equity across 200+ census tracts using Gini and Alpha fairness metrics, enabling researchers to prioritize underserved regions for transportation policy recommendations
- Reduced manual reporting workload by 45% by developing reusable analytics scripts and automated Power BI dashboards that streamlined recurring research deliverables and stakeholder presentations

Campus Recreation Assistant 09/2024–Present

- Forecasted participation trends across 15+ recreational programs using rolling average models in Excel, supporting data-informed staffing allocation and equipment scheduling decisions
- Structured checkout and usage datasets using PivotTables and validation rules, improving inventory visibility and enabling more efficient resource planning for facilities serving 200+ daily visitors

Research Data Analyst (Summer Fellow) 05/2025–07/2025

- Designed and implemented a Python and AWS data pipeline consolidating mobility records from 8 transportation systems into a centralized research dataset, processing millions of records
- Pinpointed critical service gaps across 9 urban neighborhoods by analyzing demographic and transit usage datasets, directly informing research on transportation equity and operational distribution strategies for improved accessibility
- Designed user-friendly Power BI dashboards, which helped analysts to identify three biggest causes of transit delays across different geographical locations, supporting data-driven decisions for infrastructure projects

Terna Engineering College | Navi Mumbai, MH, India
Student Data Analyst 02/2023–04/2024

- Analyzed 6,000+ bookstore transactions across 300+ SKUs using SQL queries to identify seasonal demand patterns and slow-moving inventory trends influencing procurement and restocking strategies
- Built Power BI dashboards tracking supplier fulfillment performance, demand fluctuations, and inventory turnover KPIs, reducing manual report preparation time by approximately 40%
- Generated semester-level demand forecasts using moving average models in Python and Excel, improving inventory allocation planning and reducing stock shortages during peak demand periods by an estimated 15%

DATA ANALYTICS PROJECT

AI Fashion Recommendation System | The Webster 08/2025–12/2025

- Led a team of six analysts to build a Python-based recommendation engine using 25,000+ structured product attributes, improving outfit ranking relevance and enhancing personalized product discovery for users
- Reduced manual product validation effort by 30% by analyzing API response data and implementing Excel-based validation frameworks to detect inconsistent URLs and incomplete product metadata

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL–300) (Microsoft) | Google Data Analytics Specialization (Coursera)
